

To Whom It May Concern,

Accessible Media Inc. (AMI) offers its support towards the intent to create strong and effective Canadian disability legislation at the federal level.

We are a not-for-profit multimedia national broadcaster offering three unique mandatory carriage broadcast services to all Canadians. While serving a primary audience of blind and low vision Canadians, as well as a wider disability and accessibility audience beyond that, we have witnessed the development of disability legislation at varying rates in different provincial jurisdictions across the country. It is evident that with each of these successive developments, that our country is working towards enacting national legislation in this regard.

Therefore, we support initiatives working towards this eventual conclusion and offer the means at our disposal to move the agenda forward on ensuring strong and effective legislation to support persons with disabilities across the country.

Yours Sincerely,

David Errington
President and CEO
